

Meetings for Approval of Phase III Community Enhancements

Basic improvement of the Town's infrastructure is coming to the East Island. It is a subject that has been discussed for many years and we are happy to announce that it will finally be happening. Phase Three of the Community Enhancement Project is ready for final approval. The Planning and Zoning Board has approved the plan and will review and consider lighting and traffic calming circles at the meeting scheduled for November 3rd at 7:00 PM in the Town Council Chambers. If the Planning and Zoning Board approves the plan, it will be presented to the Town Council for a final approval at the December 14, 2009 Council meeting.

The Community Enhancement Project will upgrade the infrastructure on the Islands including new streets, curbs, gutters, and lighting fixtures, hurricane resistant overhead power lines, new walking paths and additional landscaping. Once completed our Town will be not only be beautiful, but will have a solid new foundation.
